## **Treatment Consent and Release**

I acknowledge that the practice of massage and nail, hair, and skin care treatments including microablation, microdermabrasion, electrolysis, facials, body treatments, facial toning, TPR treatments, laser treatments, and various other beauty treatments are not an exact science and no specific guaranties can or have been made concerning the expected result. I understand that some clients experience more change and improvements than others. In virtually all cases, multiple treatments are required for improvements to become apparent.

I also realize that the following risks and hazards may occur in connection with any particular treatment including but not limited to: unsatisfactory results, poor healing, discomfort, redness, blistering, nerve damage, scarring, change in the skin pigmentation, and increased hair growth. I understand that even though precautions may be taken in my treatment, not all risks can be known in advance. Given the above, I understand that response to treatment varies on an individual basis and that specific results are not guaranteed. I also agree to hold harmless and release form any liability Allure Laser & Day Spa Inc. as well as any officers, directors, or employees of the above companies for any condition or result, known or unknown that may arise as a result of any treatment that I receive.

### Allure Laser & Day Spa Policies

At Allure Laser & Day Spa, we attempt to function at the highest levels of professionalism for each and every patient. Internal quality controls and customer satisfaction are very important to us. We are meticulous in documenting all treatments and transactions in your medical chart, so that we can easily track your progress. We hope that all patients will have a wonderful experience with all of our procedures, products, and spa treatments. However, in the field of cosmetic procedures, outcomes are sometimes not as the patient or practitioner had hoped. Cosmetic procedures have individual and variable results.

ALLURE LASER AND DAY SPA DOES NOT OFFER ANY REFUNDS FOR SERVICES RENDERED UNDER ANY CIRCUMSTANCES. If you choose to discontinue treatment, pre-payments for unused services will be returned upon request, less any outstanding balance. Initial

Most products sold at Allure Laser & Day Spa are available only through a physician or licensed skin care therapist. They are powerful, and have the ability to make a physical change in your skin. Thus, you may at first find them irritating. This does not necessarily mean the product is too strong for you, but that you should try using it less often until your skin adapts to it. In some cases we can give you a sample to take home with you. You can use the sample before opening your purchase, and exchange the unopened product if you are not pleased with it.

# EXCEPT IN THE CASE OF A VERIFIABLE ALLERGIC REACTION, NO REFUNDS OR EXCHANGES ARE OFFERED FOR OPENED PRODUCTS. UNOPENED PRODUCTS MAY BE EXCHANGED WITHIN ONE MONTH OF THEIR PURCHASE, BUT NO REFUNDS ARE AVAILABLE.

At Allure Laser & Day Spa, we make every effort to be on time, and count on our patients to do the same. Like most physicians' offices, we have a standard policy of charging \$50.00 for all missed appointments for which we were not given at least a 24 hours notice. Also, if you are running more than 10 minutes late, please call to see if we are still able to see you since it might interfere with the next client's appointment and you possibly might need to be rescheduled. If you miss an appointment without notifying us, we may require that you either pay \$50.00 via credit card over the phone, or stop by the spa that week to pay the required payment.

Initial

A Texas Department of Health law states that a prescription and chart review is to be done by a licensed physician with the State of Texas for any cosmetic procedure. This includes all Laser Treatments, Botox, Restylane, Mesotherapy, and Permanent Cosmetics. In order to comply with these regulations we must collect a onetime \$50.00 fee for our Medical Director that encompasses all of your procedures and treatments that may follow.

## GENTLELASE Consent Form

I authorize Allure Laser & Day Spa to perform Candela Gentlelase Plus laser therapy on me.

The Candela Gentlelase Plus a device that produces an intense light but gentle burst of light that fragments and removes the hair with selective destruction without harming the surrounding tissue. To protect my eyes from the intense light, I will have my eyes covered with an opaque material or wear laser protective glasses.

I have been informed that possible risks and complications involved with this treatment could occur. These include scabbing, crusting, scarring, blistering, purpra, hypopigmenation, or hyperpigmentation. Some of these side effects are rare. Usually if these occur, they are temporary and can resolve in a few days or weeks. For the best results, I have been informed that multiple treatments will be necessary.

Although the results are usually dramatic, I have been informed that hair reduction is not an exact science and no guarantees can be or have been made concerning the expected results in my case.

Anesthesia is usually not necessary as this laser also uses a cooling device that delivers a spray to the surface of the skin to reduce discomfort, when the laser pulse is delivered. If additional anesthesia is needed, all options will be discussed with me.

I consent to taking photographs during the course of my laser therapy for the purpose of medical education.

I understand that immediately following the laser treatment, the treated area will appear as a red discoloration and have edema (swelling) which may last up to two hours or longer. The redness or erythema may last up to 2-3 days. The treated area will feel like a sunburn for a few hours after treatment.

I understand that the hair may take up to 2 weeks to fall out after each treatment, and an average of 5-7 treatments are likely to be required to achieve results. In most cases touch up treatments will be required at least once or twice a year. 100% hair reduction is usually not achieved.

This laser is also used to remove benign pigmented lesions (brown spots). The same risks and complications mentioned above also apply for this treatment. It is very important not to pick or scratch the treated area. Results may be gradual and require several treatments.

Antibiotic ointment or Laz-X may be used for a few days after treatment if needed or possibly only aloe vera gel will be necessary. Improper care of the treated area may increase the chance of scarring or skin textural changes. This has been discussed with me.

I have read and understood all information presented to me before signing this consent.

### GentleLASE Laser Hair Reduction FAQ's

*How many treatments does it take to clear an area?* On average 6-8, depending on your skin type it may take more treatments. Generally you can expect to come in for touch up treatments once or twice per year after you have had all of your treatments.

#### Should I expect to be hair free in the treated area after the series of treatments?

Not necessarily, most patients experience an 80-90% reduction in the amount of hair in a given area, but should not expect to be hair free. Normally there are a few thin, willowy, hairs that we can touch up if they bother you.

*Is laser hair reduction permanent?* Laser hair reduction has been in use for some time, and stable hair loss has been reported as far back as seven years, however "permanence" cannot be claimed at this time.

Why does the hair appear to still be there, and will look like its growing for 1-3 weeks post treatment? The laser does not remove the hair at the time of treatment, but the hair will fall out, or be "shed" 1-3 weeks after treatment.

*Why does the laser not work well on blonde, gray, or red hair?* The laser energy interacts with pigment or "melanin" in the hair root, and these hair colors either don't have much/nay melanin in them, or it is of a type (pheomelanin) that does not absorb light as well as the other form of melanin (eumelanin).

Why must patients not use any form of epilation for 6 weeks prior to treatment with the GentleLASE? The hair root has to be present for the laser to work, so if the patient has removed it with waxing, plucking, or electrolysis, then there is nothing for the laser energy to interact with.

Why must tanning be avoided for 6 weeks before and after treatment? Melanin formation in the skin as a response to sun exposure, decreases the effectiveness of the treatment, as well as makes it more likely that the patient will experience hyperpigmentation, hypopigmentation, or blistering from the treatment. Also, very dark skinned people are not good candidates for laser hair reduction because of the active melanin in their skin and could have a reaction.

Why must the area to be treated be shaved just prior, or up to 2 days before treatment? Surface hair, if present will be singed off, increasing the risk of a burn, as well as taking up energy that does not get to the root of the hair follicle.

*Why must protective eyewear be worn by everyone in the treatment room?* The GentleLASE is a high powered laser system, and can cause eye injury if proper eyewear is not worn while the laser is used.

*Can any area of the body be treated?* Yes, with the exception of eyelashes, and the shaping of eyebrows due to the proximity of the eye and the danger of eye injury with a laser.

**Does the treatment hurt?** There is a stinging sensation felt during treatment, however most patients who have waxed or had electrolysis report that it feels less painful than those types of treatments.

*What are possible side effects of laser hair removal?* Side effects can include blistering, hyperpigmentation, hypopigmentation, or scarring. Risks of these side effects are minimized if treatment instructions are closely followed by the patient.

*Why is it so important to have a treatment every 4-5 weeks?* The hair grows in three stages and we are trying to synchronize the hair growth to get as many hairs as possible with each laser treatment. The only way to do this is by lasering the hair every 4-5 weeks.
